

## 32" IPS panel with KVM switch, USB-C dock and RJ45 (LAN)

Equipped with the KVM switch, the XUB3293UHSN allows you to connect multiple computers that can be operated over one console (monitor, keyboard, mouse). The USB-C dock provides a clean and practical workspace by using a single cable to both send the signal from your notebook to your monitor and power and charge the notebook from the monitor. Additionally, if your monitor is connected to the Internet with a LAN cable, your notebook will automatically be connected to the network as well. IPS panel guarantees wide viewing angles and natural, highly accurate colours.

### KVM SWITCH

Having a monitor with a KVM switch allows you to share the devices connected via USB to your monitor with two different PCs. Just change the signal input in the OSD menu of the monitor and your keyboard, mouse and webcam will switch from your work laptop to your gaming PC.

### USB-C Dock

The dock allows you to connect your laptop with a single cable to the monitor to both make sure it is charged and connected to a wired network and signal from the laptop is sent to the monitor. With additional USB-ports, your mouse, keyboard or webcam can also be connected to the monitor. All thanks to a single cable connecting your laptop\* to the USB C dock in the monitor.

\*Functions vary depending on your laptop USB-C support.
