

Gold Phoenix – immerse yourself in the game with a 32” curved monitor featuring 144Hz refresh rate

Imagine yourself sitting in front of a 32-inch curved panel. The screen size and the curved design make it easy to perceive all the action happening on the screen. Nothing disturbs your attention. Grab your headset from the hook at the back of the monitor and step into the game. Enjoy sharp, vivid colours guaranteed by VA panel technology. Take the advantage of the ability to adjust brightness and the dark shades with the Black Tuner function to improve visibility in shadowed areas. The gameplay is smooth. FreeSync technology and 144Hz refresh rate eliminate ghosting and smearing so you can make split second decisions. Immerse yourself and win.

Curved design

Inspired by the curve of the human eye, the 1800R curvature of the screen guarantees a much more realistic viewing experience allowing you to really immerse yourself in the game.

144Hz

Rapid refresh rate and frame rate guarantee smooth, blur free and judder free graphics, with lower latency and lag improving response times for fast paced games. Especially suited to the fast pace games like FPS, racers, MOBA and sports where the 144Hz refresh rate delivers the crisp and sharp images needed to raise your game.
