

22.5" 1920 x 1200 monitor featuring IPS panel technology and a height adjustable stand

The demanding data and application heavy world needs a display that creates a more productive work place. With 1920 x 1200 resolution, the XUB2395WSU offers 11% more height with the same width as a Full HD display, which works much better for spreadsheets, word documents and browsing the Internet. The height adjustable stand with PIVOT function allows you to easily adjust the monitor position to your preferences and the IPS panel technology assures accurate and consistent colour reproduction with wide viewing angles.

Available also with fixed stand: [ProLite XU2395WSU-B1](#)

IPS

IPS displays are best known for wide viewing angles and natural, highly accurate colours. They are especially suited for colour-critical applications.

HAS + Pivot

With a height adjustable stand you will create an ergonomic work posture and position that meets all health and safety requirements. This will not only prevent any health issues but will also increase your productivity. The pivot function allows the screen to rotate from landscape to portrait orientation. This functionality can be useful if the application requires more height than width.
