

55" Professional Digital Signage display with an 24/7 operating time and 2500cd/m² brightness

Enjoy the sun with the ProLite LH5510HSHB. A professional high-brightness Full HD (1920x1080) digital signage display with 2500cd/m² for a crystal-clear image in any brightly-lit environment. Featuring a non-blackening IPS M+ LED panel for exceptional and long-lasting colour and image performance and a 50% lower power consumption than industry average.

The LH5510HSHB comes with a landscape and portrait orientation and 24/7 operating time, offering businesses an effective and energy-efficient solution to help capture their audience's attention in even the brightest of places.

Sunlight readable

This display features a high-brightness which makes it ideal for brightly-lit environments and sunny locations such as shop windows. The high-brightness ensures that your content is always clearly visible even when the sun is shining directly on your display.

LED blackening effect free

LED blackening or solar clearing happens when a regular LED display is installed in a location with direct sunlight on the display. The sunlight will heat-up the display and cause the LED's to discolour and eventually turn black. A blackening effect free LED panel is specially designed to withstand higher temperatures up to 110 degrees Celsius of the LED panel preventing discolouration of the LED cells because of direct sunlight exposure.
