

## 22" Full HD monitor with VA panel and a height adjustable stand

The ProLite XUB2294HSU featuring VA panel technology guarantees accurate and consistent colour reproduction with wide viewing angles. Triple input configuration (VGA, HDMI, DisplayPort) and a USB hub assure compatibility with many platforms. The height adjustable stand with PIVOT function allows you to easily adjust the monitor position to your preferences making it a solid solution for both home and the office.

VA panel technology offers higher contrast, darker blacks and much better viewing angles than standard TN technology. The screen will look good no matter what angle you look at it.

With a height adjustable stand you will create an ergonomic work posture and position that meets all health and safety requirements. This will not only prevent any health issues but will also increase your productivity. The pivot function allows the screen to rotate from landscape to portrait orientation. This functionality can be useful if the application requires more height than width.
